ABOUT ME

Aspiring IoT and Cybersecurity engineer currently pursuing a Bachelor of Engineering in IoT, Cybersecurity, and Blockchain Technology (ICB) at Alav's Institute of Engineering and Technology. Passionate about building secure, scalable systems that integrate hardware and software seamlessly. Skilled in hands-on electronics, microcontroller programming (Arduino, ESP32), and wireless communication protocols (LoRa, Wi-Fi, Bluetooth). Adept at troubleshooting hardware/software issues, optimizing embedded systems, and visualizing sensor data through interactive displays.

EDUCATION

ALVA'S INSTITUTE OF ENGINEERING & TECHNOLOGY

B.E in IoT and Cyber Security and Blockchain Technology

2023-PRESENT

GOVERNMENT PU COLLEGE KARKALA

Pre - University Education

2021 - 2023

GOVERNMENT HIGH SCHOOL KARKALA

Secondary School Leaving Certificate (SSLC)

2020 - 2021

SKILL

- Visual Imagination
- Python
- HTML
- Communication
- SQL
- Java

PROJECTS

Library Management System

- Library Management System for handling the data efficiently Designed and developed a web-based platform for managing borrow and return details of books.
- Implemented a SQL database to handle In-out history details, registrations, and user data efficiently.
- Built a responsive interface using HTML, CSS, and Python for smooth library management and user interaction.
- Improved data management and reduced manual errors by automating registration and reporting processes.

INTERESTS

- Passionate about designing and developing IoT-based solutions that integrate sensors, microcontrollers, and wireless communication for real-world applications.
- Enthusiastic about coding across platforms, with a focus on embedded systems, automation, and scalable software development.
- Keen interest in website development, UI/UX design, and building responsive web applications that connect with IoT devices.
- Continuously exploring emerging technologies in cybersecurity and blockchain to enhance data integrity and system security.
